Squamish Nation

Yúusnew'as

Taking care of each other

Data sharing and analysis to help all communities

Presented by:

**Ashley Whitworth, Project Director
Squamish Nation – Yúusnewʷas Project**

Looking beyond the numbers

215

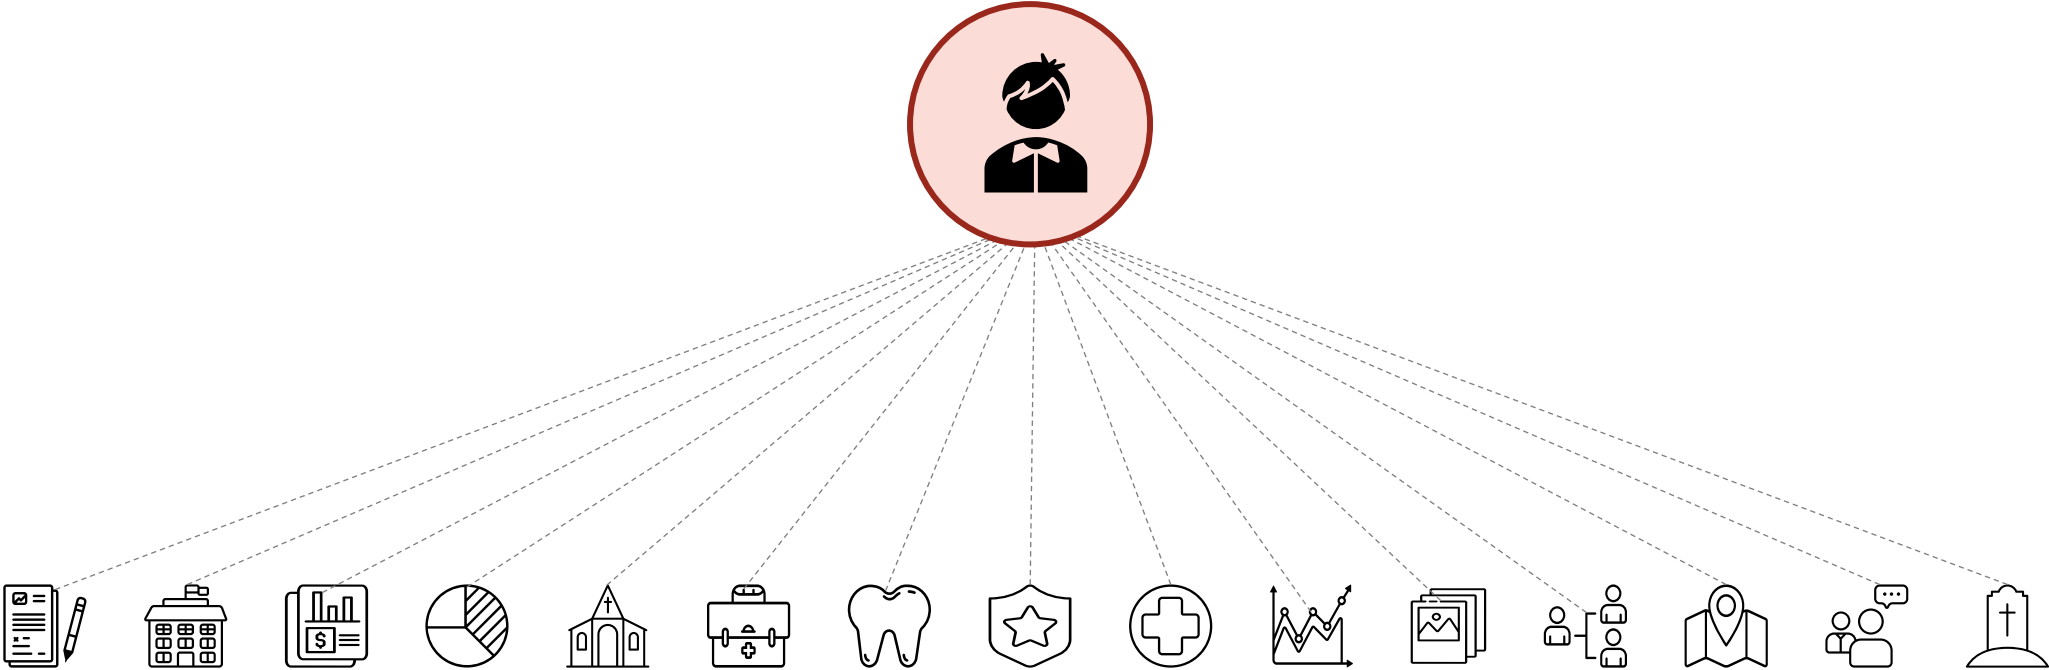

Treating every student as a unique experience throughout their whole truth

Understanding why the experience happened through context of the time, geography, and community

Ensuring every community gets a personalized effort, not just lead communities that are doing the research

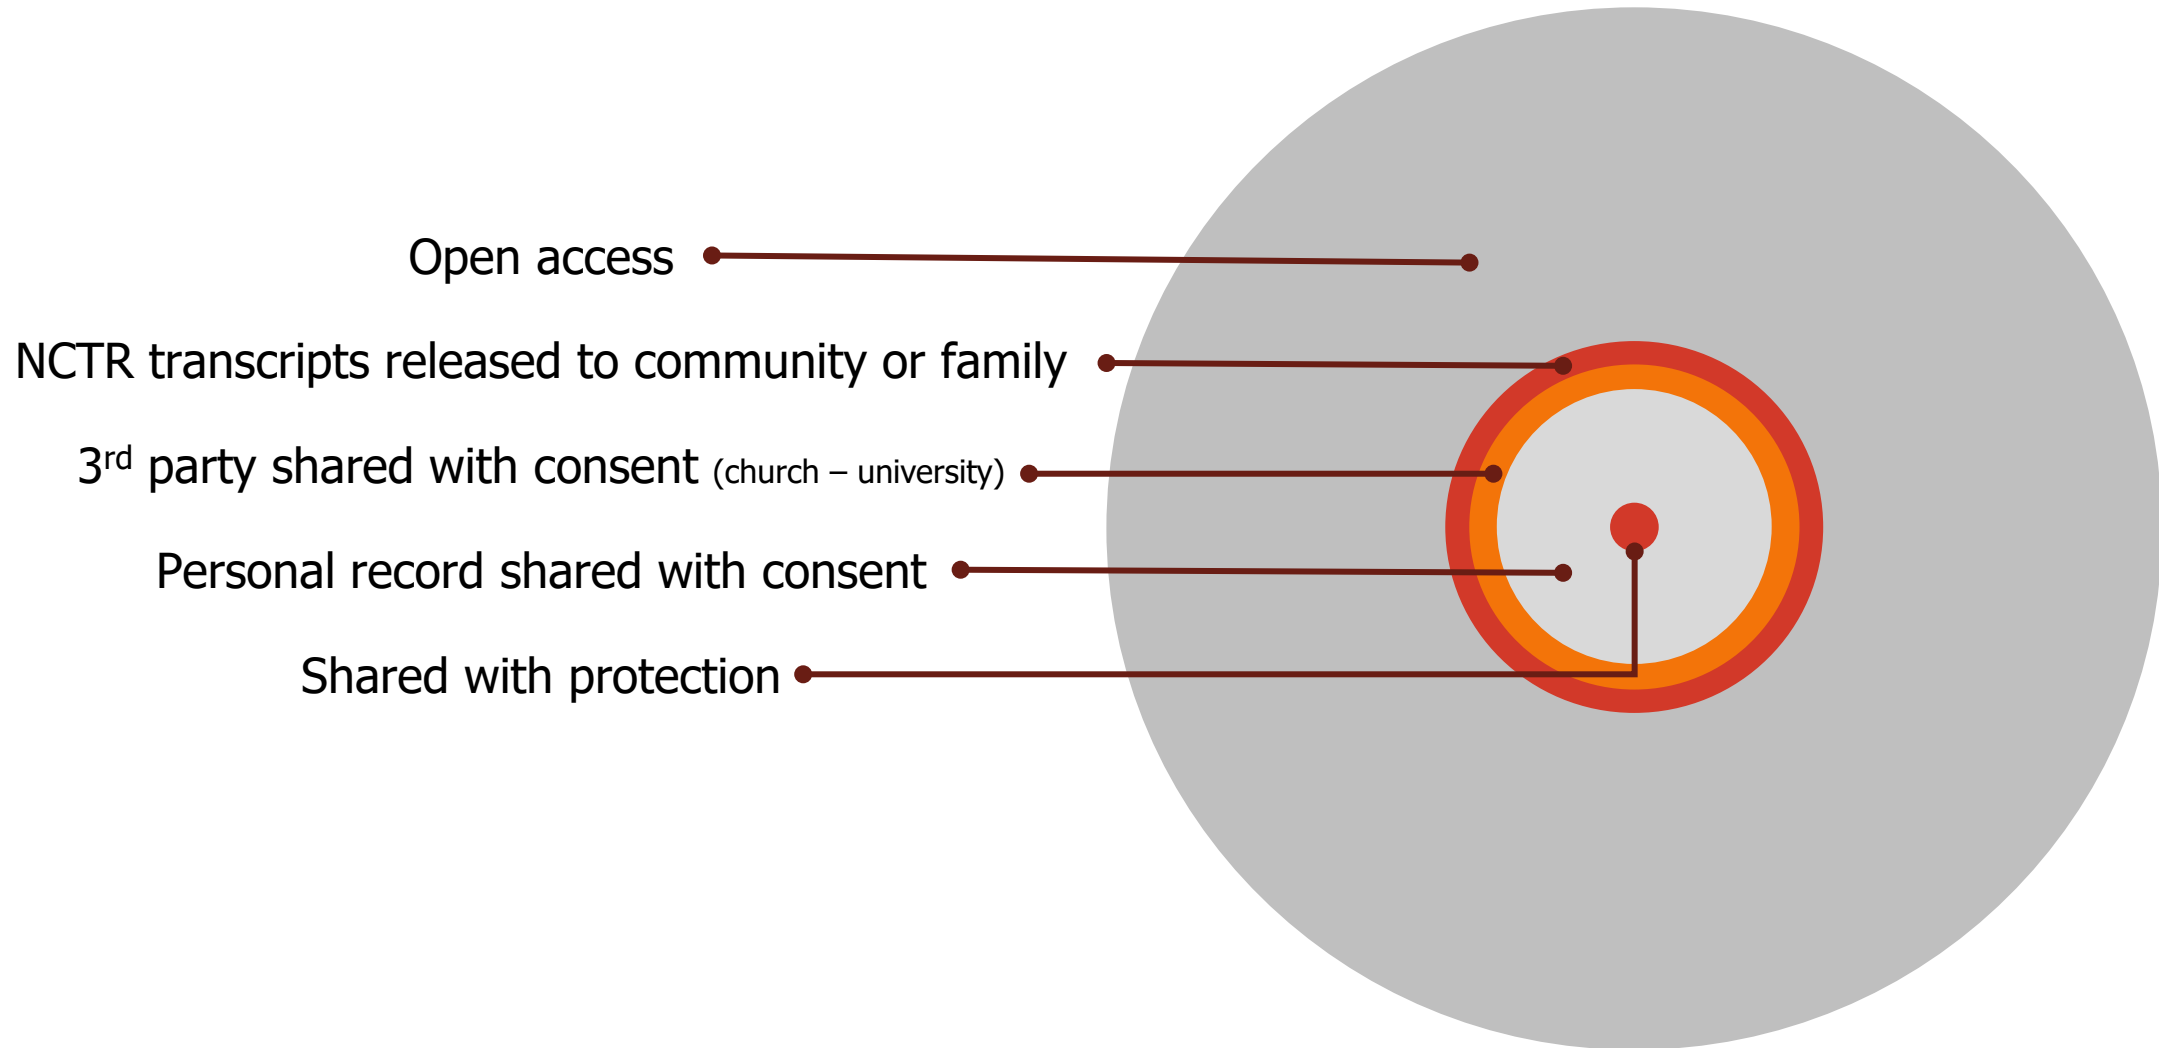

Finding definitive numbers does not answer the questions community members are asking

Student view

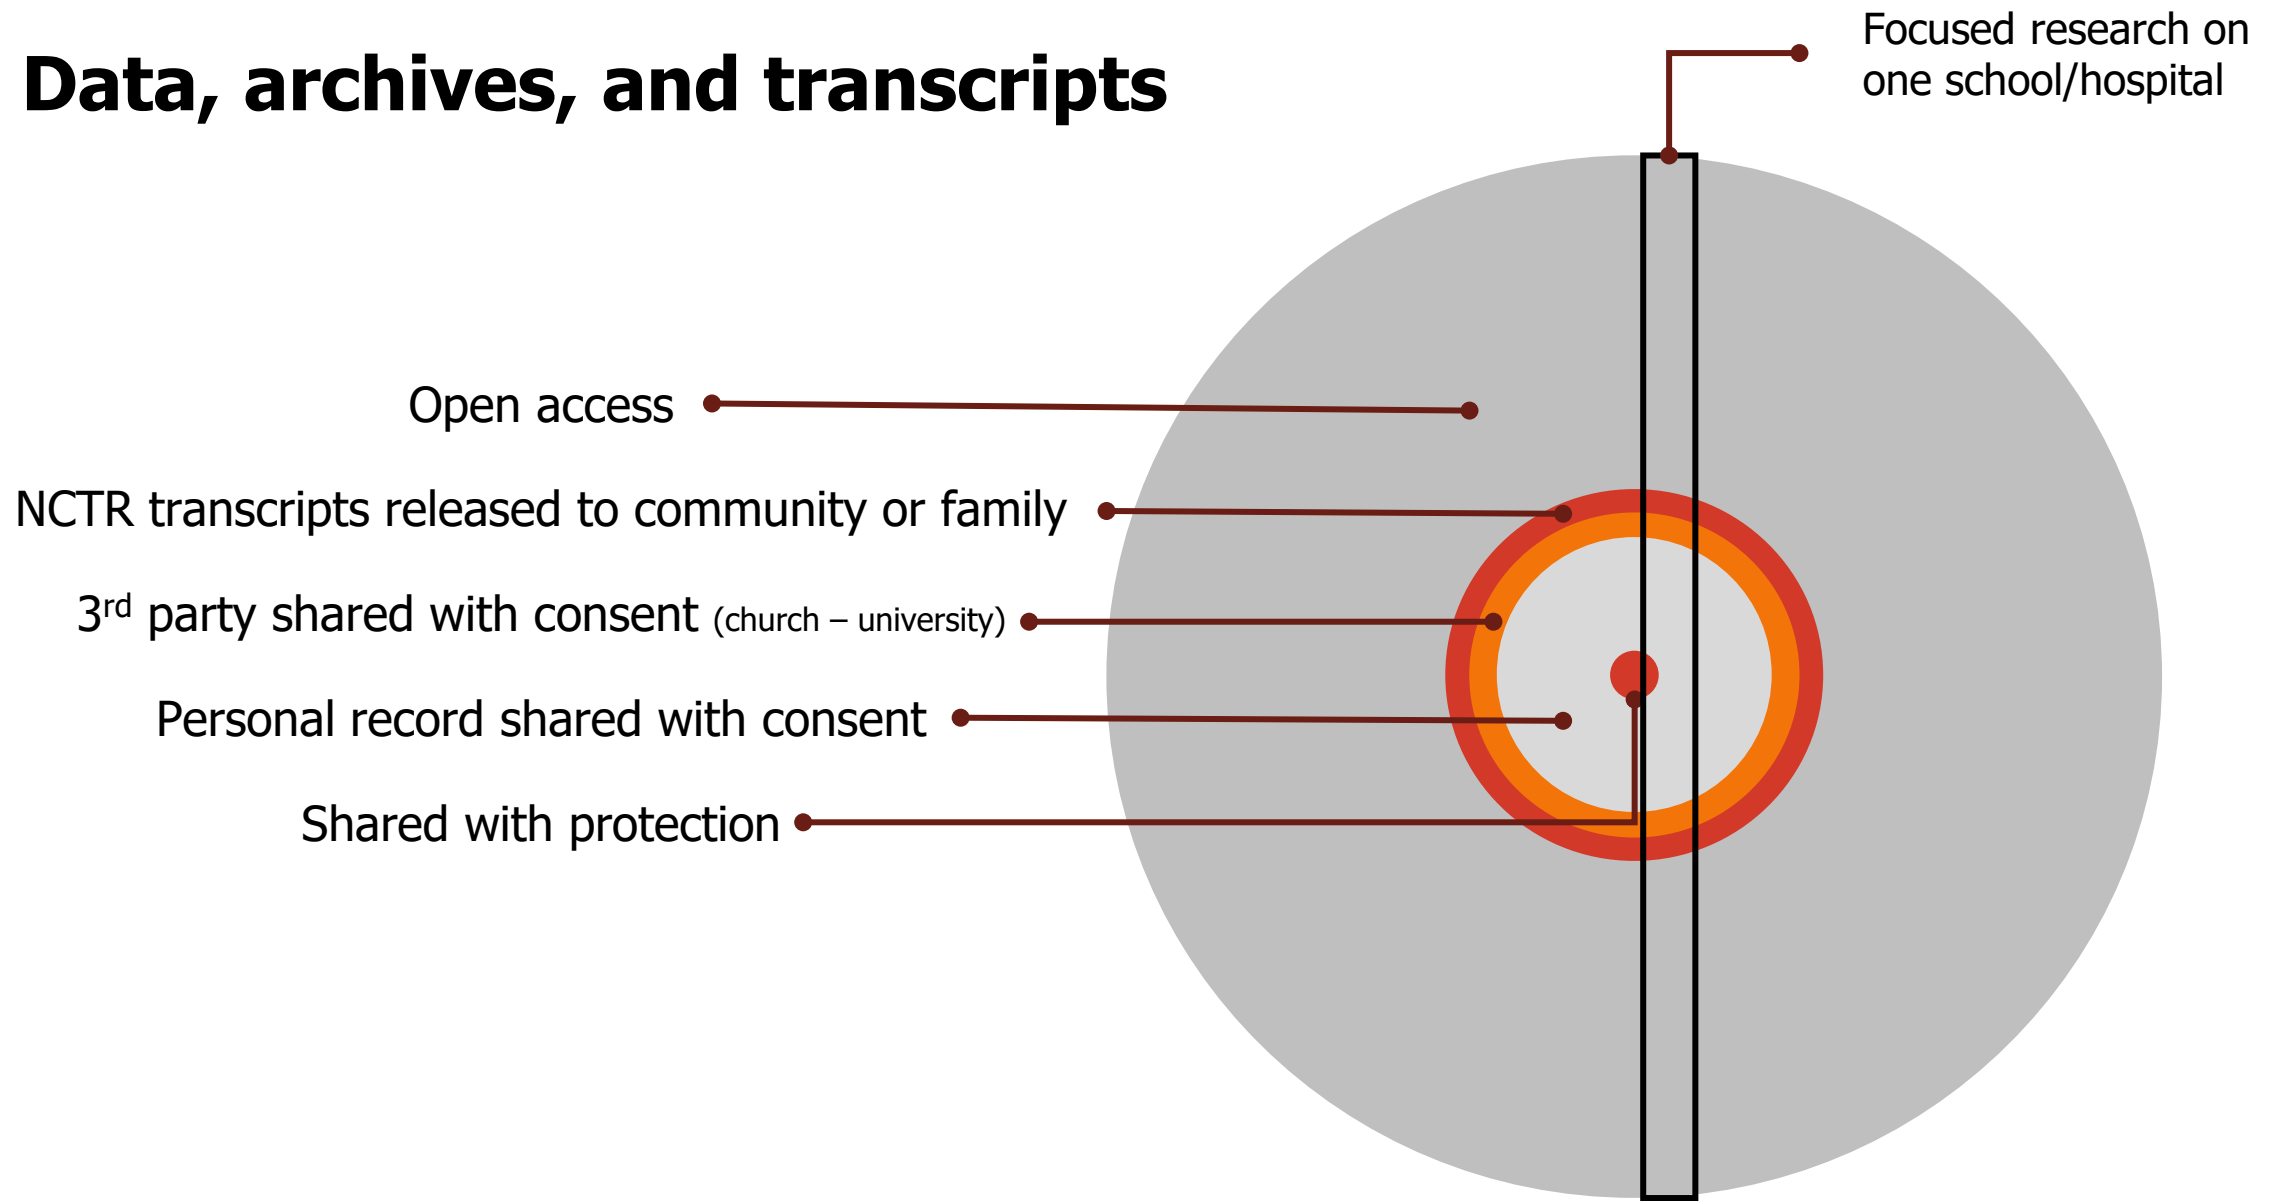

Records with direct and indirect connections to the student experience

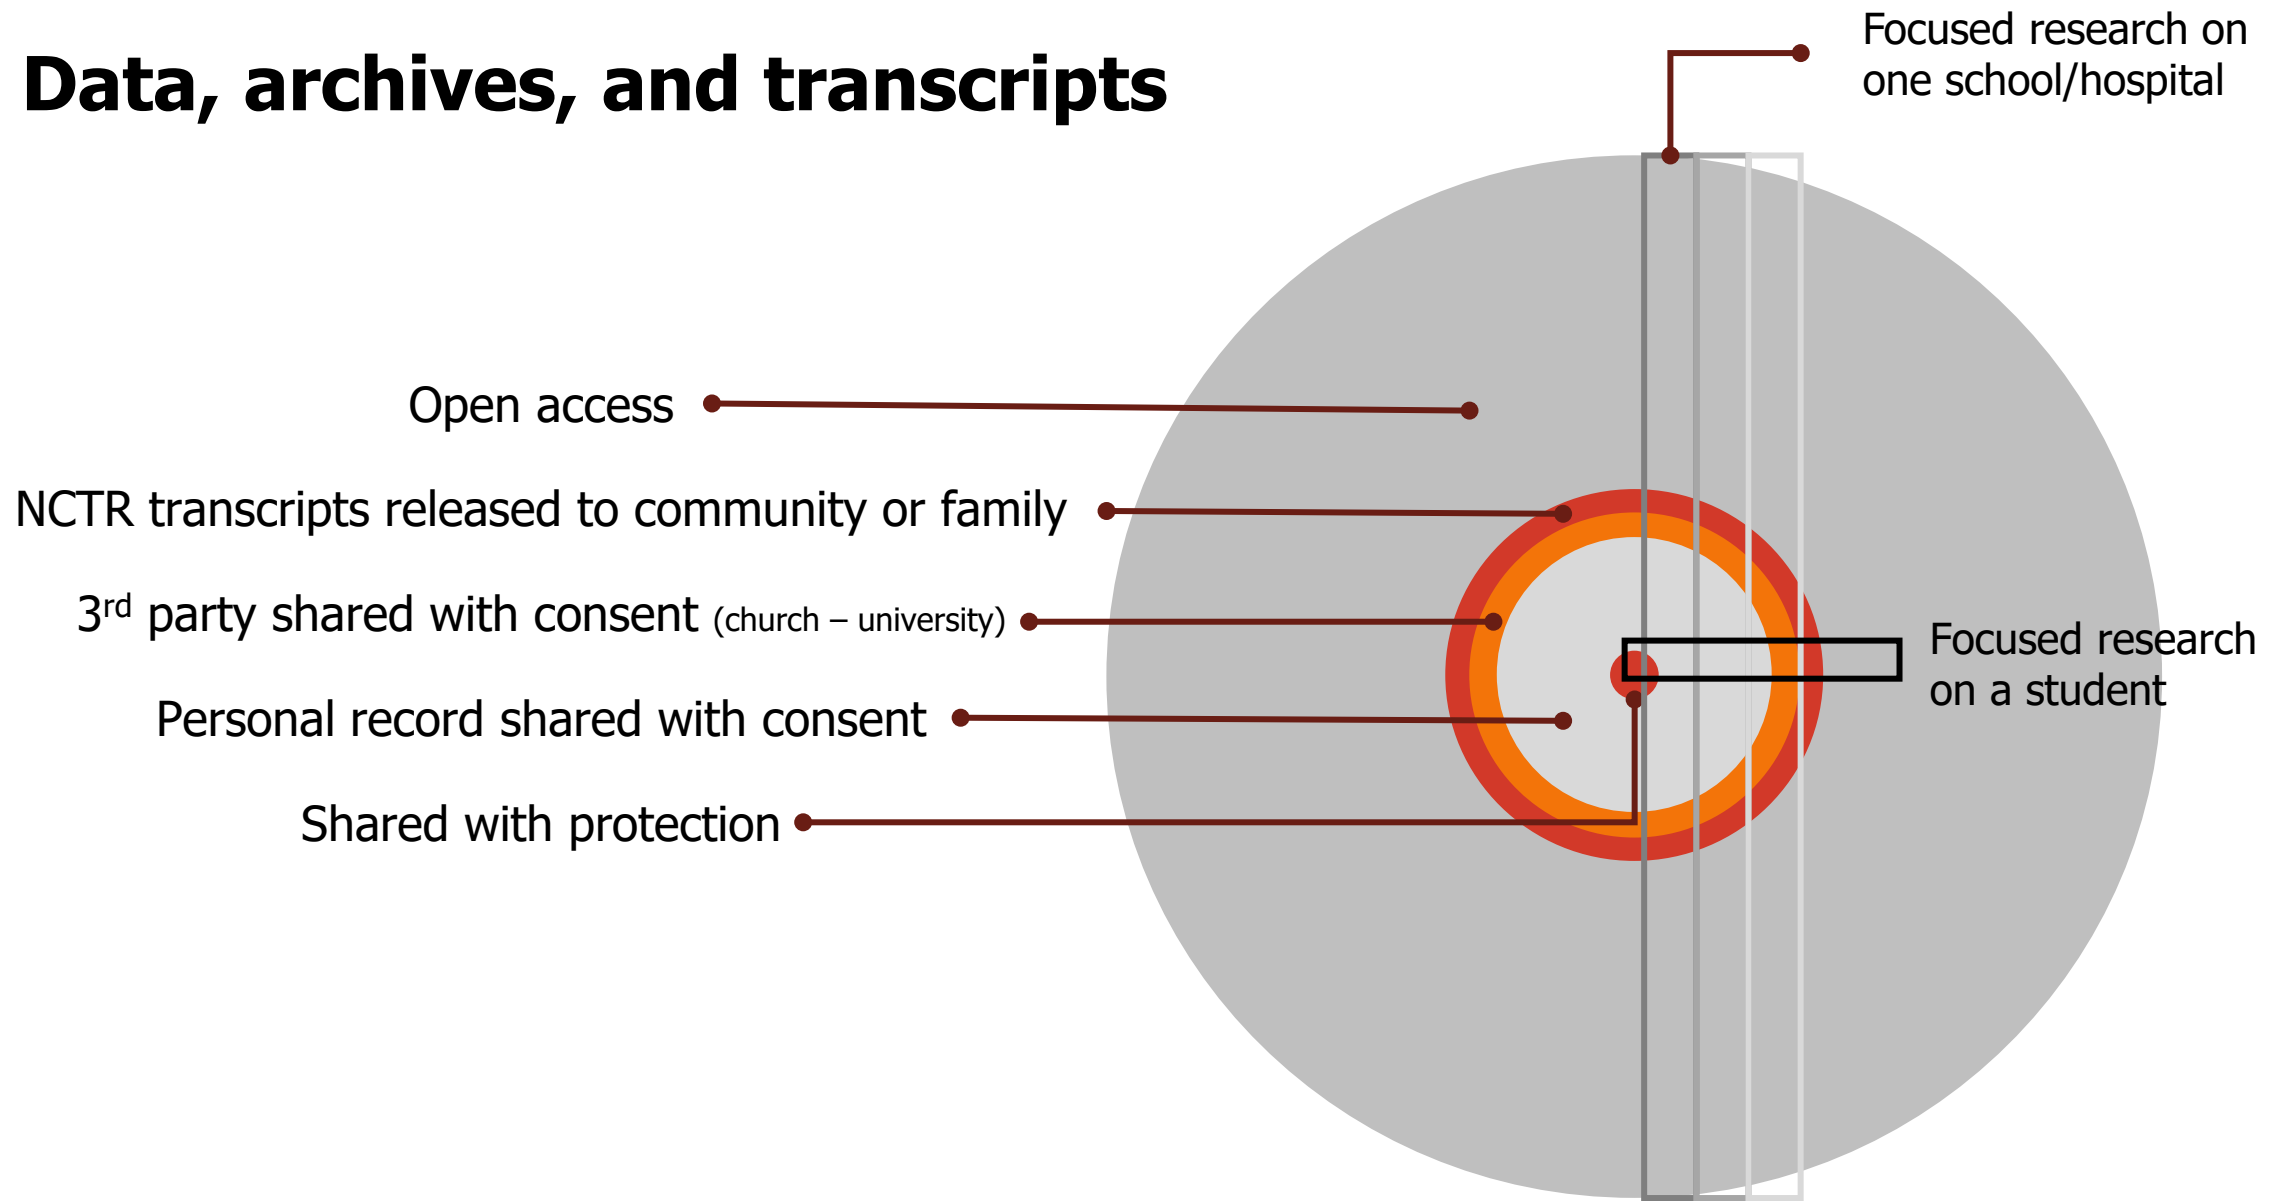

Data, archives, and transcripts

Data, archives, and transcripts

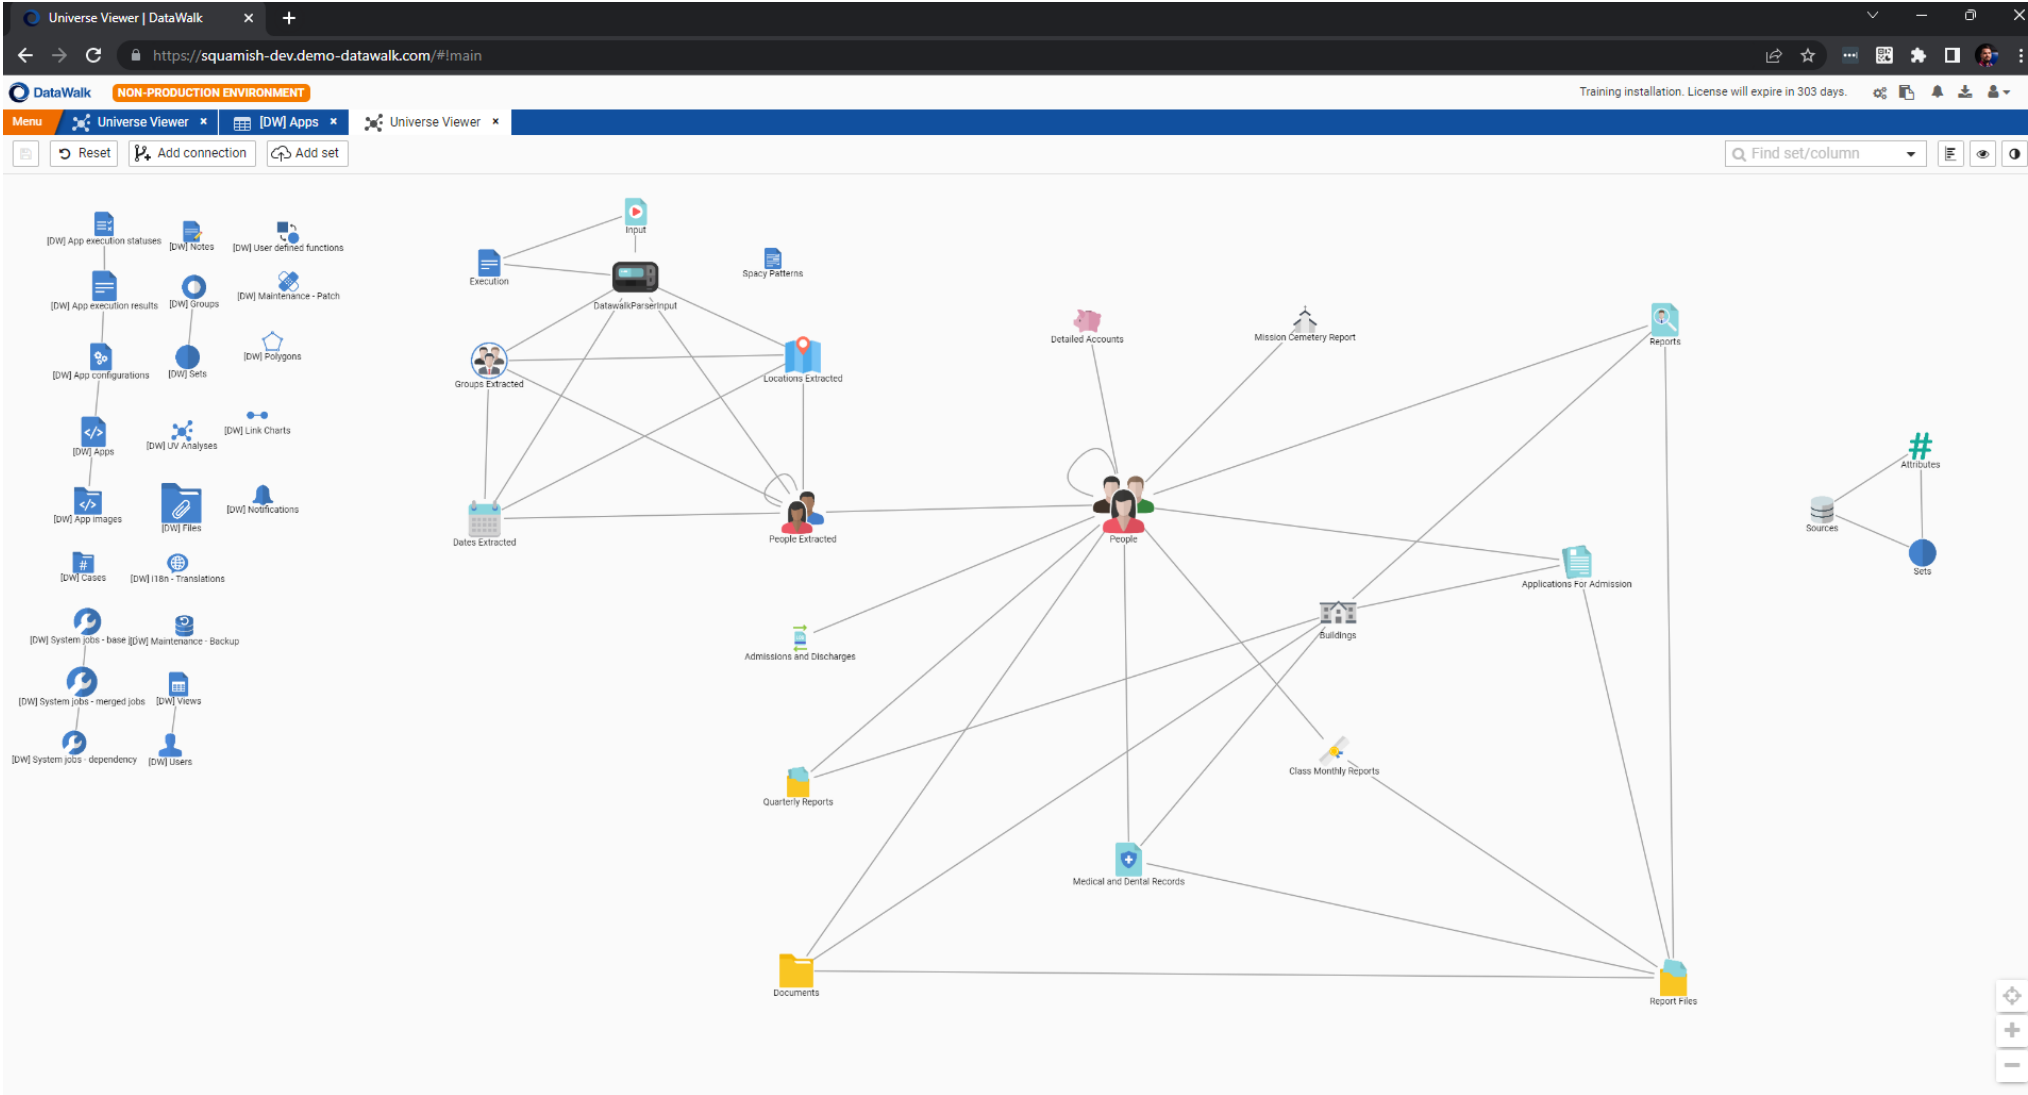

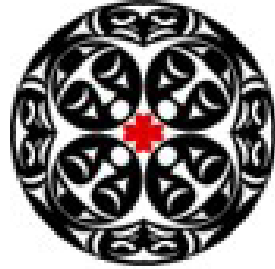

Data, archives, and transcripts

Share analytic platform

Build confidence and trust that projects will achieve a comprehensive view of experience and lift the burden of truth off survivors, families, and communities.

Requirements for success:

- **Data sharing agreement with levels of data protection**
- **Data governance**
- **Share access to archives and data on all school and hospital sites**
- **Accelerate research capabilities and results across communities**
- **Minimize duplication of effort**
- **Squamish Nation to share the analysis platform**
